

3 REASONS WHY YOU SHOULD ORGANIZE A STORM DRAIN MARKING PROJECT

1

You can help educate the community

By placing aluminum markers on storm drains, you will remind residents that when stormwater goes into the drains, it is unfiltered and leads directly to our streams. All storm drains should remain clear of debris and other types of non-point source pollution such as pet waste, fertilizers, paints, and automobile fluids.

IT'S A FUN & EASY SERVICE PROJECT FOR CLUBS, SCOUTS, FAMILIES, AND COMMUNITY ORGANIZATIONS!

2

*SIMPLY COUNT THE NUMBER OF STORM DRAINS IN THE NEIGHBORHOOD YOU WANT TO MARK, SUBMIT A PROPOSAL, GET YOUR SUPPLIES, AND THEN APPLY THE ALUMINUM MARKERS TO THE STORM DRAIN COVERS.

3

We provide all of the supplies!

The Cobb County Water System will provide marking kits upon request. The kits include aluminum markers, adhesive pads, gloves, garbage bags, and educational materials.
